

The Traditional/Generic Nursing BSN program is designed to prepare high school and transfer students for professional nursing practices in a variety of health care settings. The program gives students the knowledge of nursing, humanities, behavioral and natural sciences which are needed in this complex field.

* Students who have not had biology or chemistry in high school and within five (5) years prior to admission are required to successfully pass BIOL 107 Comprehensive Review of Life Science. This course must be taken prior to enrolling in any science course required for the Undergraduate Nursing Program. Registered Nurses are exempted from this requirement.

COPPIN STATE UNIVERSITY HELENE FULD SCHOOL OF NURSING

TRADITIONAL BSN PROGRAM OF STUDY
